

Make Kaya work for your Organisation

Powered by a catalogue of hundreds of courses in multiple languages, Kaya provides users from around the world with free access to humanitarian learning. In addition we have extended Kaya to respond to your organisation's needs with modern, intuitive workflows and a range of engaging activities and resource features.

Bespoke Learning Spaces

No two organisations are the same. We've created a range of low-cost, highly flexible and adaptable products to offer you the ability to design and manage your own interactive learning content through Kaya. Whether you create or curate, our products will meet all your learning needs.

Sama Dhab / Save the Children

Learner Progress Backed by Data

Kaya provides key insight reporting direct to learners and administrators throughout the learning journey. This data-driven approach will ensure your organisation and learners consistently achieve their goals.

Training and Support

The Kaya team will partner with you every step of the way. Our learning design, onboarding and training packages with our ongoing technical support ensure you have everything you need to save time and focus on what's most important, your learners.

Our Innovative Product Offerings

Kaya Create

This consists of a single course page with full admin access, to create or upload your own content onto Kaya using its numerous features, supporting learners to access your learning opportunities.

Kaya Share

An open portal to curate, create, and share courses with external partners and audiences. A Kaya Share portal comes with full admin access and autonomy to manage and support a variety of learners accessing your content. With your organisational theme applied to all courses, your logo and primary brand colours, you can ensure learners everywhere recognise your name with quality learning.

Kaya Prepare

A closed portal to create new courses or curate existing ones from the Kaya catalogue. Share learning assets including mandatory certification programmes and learning pathways with unlimited internal audiences, such as your staff or volunteers. With your organisational theme applied to all courses and learner dashboards and full admin access to manage your portal, there is also the option for Single-Sign-On (SSO) with your existing IT systems.
